Unless stated herein the right to install, maintain, and operate their equipment above and below ground and all other rights incident thereto shall remain with the Public Utility. (PUE) identified on the plat may as may be necessary or desirable in providing utility services within and without the lot identified herein, including the right of access to such facilities and the right to install, maintain, and operate their equipment above and below ground and all other rights incident thereto. The Public Utility shall have the right to remove all obstructions within the PUE of the center's easement, or the Utility may remove such obstructions if the lot owner fails to do so within the time specified herein. The Public Utility shall have the right to install, maintain, and operate their equipment above and below ground and all other rights incident thereto within the PUE of any other obstruction when consistent with the use of the PUE subject to the prior written approval of the lot owner.
